# Mohamed Said

mohamediasaid@outlook.com | linkedin.com/in/misaid | github.com/misaid

## Education

**University of Alberta** — Edmonton, AB
*Bachelor of Science in Computer Science* — *Sept. 2022 – Jun. 2025*

## Technical Skills

**Languages**: TypeScript, JavaScript, Python, Java, C/C++, C#, Ruby, SQL, HTML/CSS
**Frameworks & Libraries**: React, Next.js, Node.js, Express, Ruby on Rails, React Native, Prisma
**Data & Cloud**: PostgreSQL, MongoDB, Redis, Supabase, Sanity CMS, AWS (S3), Cloudflare
**Developer Tools**: Git, Docker, Linux, Jest, Selenium, Stripe API, OpenAI API
**AI Tooling**: Claude Code, Cursor, GitHub Copilot, OpenAI Codex, Prompt Engineering
**Certifications**: Microsoft Foundational C#, Microsoft Certified: Azure Fundamentals

## Work Experience

**Software Developer** — Jul. 2026 – Present
*Freelance* — *Edmonton, AB*

- Designed, built, and deployed **two production nonprofit websites** for separate clients with a **Next.js** frontend and **Sanity CMS** backend, owning requirements, implementation, and launch end to end
- Delivered CMS-driven pages for events, gallery, and services, including a **36-page site offered in two languages**; both sites scored **99 on Google Lighthouse** for performance, accessibility, and SEO
- Architecting a **school management platform** for ∼500 students and staff (assignments, attendance, grading, enrollment, role-based dashboards) in full-stack **TypeScript** on **PostgreSQL, Prisma, Redis, and Docker**
- Implementing **Google Workspace SSO**, MFA, and role-based access for student, teacher, parent, and admin accounts, working directly with school staff to turn requirements into features

**AI Evaluation Analyst** — Sep. 2025 – Present
*Outlier* — *Remote*

- Evaluated **LLM prompt-response pairs** for factual accuracy, coherence, and adherence to writing-quality guidelines, applying a structured rubric across a high volume of outputs
- Delivered written feedback and recommendations on prompt design and model behavior, improving **response accuracy and relevance**
- Selected from a pool of analysts to **peer-review evaluations** submitted by other reviewers, catching inconsistencies and enforcing quality standards across the team

**Student Software Developer** — Sep. 2024 – Dec. 2024
*Nexzones* — *Edmonton, AB*

- Built a **no-code, node-based platform** streamlining daily developer operations, improving workflow efficiency by **65%**
- Served as **Scrum Master** for a team of 8 student developers, successfully leading the team to deliver all project milestones on time despite tight deadlines
- Achieved **80%** test coverage using **Jest** for unit tests and **Selenium** for UI tests, enhancing application reliability
- Containerized the application using **Docker**, simplifying deployment and ensuring cross-environment compatibility

## Projects

**Homi** | *Ruby on Rails, Redis, Cloudflare, Supabase, React Native, TypeScript* — Aug. 2025 – Jan. 2026

- Built a **property management platform** with a React Native app and scalable **Ruby on Rails API**, implementing Units/Tenants CRUD workflows with typed validation using Zod and react-hook-form
- Integrated **Redis, Supabase, Cloudflare, Docker**, and Expo push notifications to support rent reminders and maintenance alerts across iOS and Android

**Gen Shop** | *Stripe, OpenAI, AWS, React, Express, Node.js, MongoDB* — Jun. 2024 – Sep. 2024

- Developed a **full-stack e-commerce platform** with React and a **Node.js/Express REST API**, integrating MongoDB, Stripe, OpenAI, and AWS S3 for payments, order management, and AI-powered product generation
- Optimized image delivery using **Sharp**, achieving **44.73x compression** while maintaining quality and storing optimized assets in **AWS S3** for faster delivery and browser caching
